Summary

I'm a B.Tech IT student (Batch 2027) with a strong interest in web development and data-driven problem-solving. I enjoy working with Python and modern web technologies like HTML, CSS, React.js, and Django. I'm also passionate about Machine Learning, Data Analytics, and Data Visualization — turning data into meaningful insights for better decision-making

Education

Shri Vishnu Engineering College For Women - Bhimavaram

B.Tech - Information Technology

2023 – 2027

CGPA - 9.20 (upto 3-2)

Skills

Languages: C, Python, Java

Web Technologies: HTML, CSS, React.js, Django

Databases: MySQL

Machine Learning: Scikit-learn, Pandas, NumPy

Developer Tools: GitHub, VS Code, Eclipse, Tableau, Power BI

Coursework: Database Management System (DBMS)

Soft Skills: Leadership, Communication, Adaptability, Teamwork

Professional Experience

Aptpath — VoxForm AI Intern

Worked on AI-based form automation (VoxForm) to extract structured data from user input.

Designed prompts to capture fields like text, checkboxes, radio buttons, and dates.

Improved chatbot flow to process complete user input before extraction.

Infosys Springboard — Data Visualization Intern

Developed interactive dashboards in Power BI to visualize IT support performance metrics and ticket trends.

Created dynamic charts and KPIs to analyze resolution time, ticket distribution, and priority-based performance insights.

Academic Projects

Plant Leaf Disease Detection - [Link](#)

Tech Stack: Python, Computer Vision, TensorFlow

Developed a machine learning model achieving 95% accuracy for early detection of plant leaf diseases using image processing and classification algorithms.

Implemented data augmentation techniques improving model performance by 20% and reducing classification errors.

AI-Powered Travel Planner (Ongoing)

Tech Stack: React.js, Django REST Framework, SQLite, JWT, JavaScript, HTML, CSS, AI API

Developed a full-stack AI-assisted travel planning platform enabling users to create trips and collaboratively build itineraries.

Integrated AI suggestion APIs with OTP authentication, trip management, voting features, and automated email notifications.

Appointment Booking System - [Link](#)

Tech Stack: React.js, Node.js, Express.js, MongoDB, Tailwind CSS, JWT Authentication

Built a hospital appointment scheduling system with OTP authentication and real-time slot booking.

Included appointment creation, edit, cancel, status tracking, and report export functionalities.

Achievements & Certifications

Data Analytics Certified: IBM certification in Data Analytics "Turning Data into Decisions using Python".

TATA Data Visualization Simulation: Created Tableau dashboards translating stakeholder requirements into actionable insights.

HackerRank Problem Solving: 5-star rating with Python (Basic) certification.

Java Foundation Certification: Completed certification on Infosys Springboard.

Coding Profiles

HackerRank: [@23B01A12A9](#)

LeetCode: [23b01a12a9](#)

CodeChef: [mattatejasree](#)
